

# UEC-ERATO Symposium

~ Recent Progress in Optical Frequency Comb ~

August 26, 2017, Saturday

10:00 – 13:00

Room 241, 2<sup>nd</sup> fl. Bldg. E-5

The University of Electro-Communications (UEC)

## *Opening remark*

10:00 **Fukuda, T. (President, UEC)**

## *Invited talk*

**Weiner, A. (Purdue University, USA)**

"Measurement of Frequency Bin Entanglement in Biphoton Frequency Combs"

**Cundiff, S. (Michigan University, USA)**

"Nonlinear Comb Spectroscopy"

**Zheng, Z. (Beihang University, China)**

"Single-cavity dual-comb fiber lasers and their metrology applications"

**Coddington, I. (NIST, USA)**

"Gas plume detection with dual-frequency comb spectroscopy"

**Kim, Y. (Nanyang Technological University, Singapore)**

"Frequency-comb-referenced precision measurement of surface profiles and refractive indices"

## *Closing remark*

12:50

Contact: Minoshima Laboratory, UEC. [minolab-webmaster-ml@uec.ac.jp](mailto:minolab-webmaster-ml@uec.ac.jp)

See more info: <http://www.femto-comb.es.uec.ac.jp/>

Organized by: JST, ERATO MINOSHIMA Intelligent Optical Synthesizer Project

Co-organized by: Institute for Advanced Science, UEC
